Allowable Subject Matter

1. Claims 10-16, 18 and 19 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art a method of repairing electrode pattern defects of a plasma display panel comprising performing an inspection process to determine a pit defect and a salient defect of the plasma display panel; performing a first one-step repairing process for filling the pit defect and performing a second repairing process for removing the salient defect.
4. The closest reference JP 2000-348623 (Fujiko) discloses a method of repairing electrode pattern defects of a plasma display defects comprising the steps of performing a one-step repairing process with a conductive paste for repairing the electrode pattern defects such as broken connection. However, Fujiko alone or in combination with any other references fail to teach or suggest the claimed step of performing an inspection process to determine salient defect and performing a second repairing process for removing the salient defect.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
